**Supplemental
DETAILED ACTION**

Response to Arguments

1. Applicant's arguments, filed 4/21/2008, with respect to claims 3 and 4 have been fully considered and are persuasive.

Election/Restrictions

2. Claims 1-2, 28, 39 & 40 are allowable. The restriction requirement of Species 1 to Species 13, as set forth in the Office action mailed on 12/20/2006, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

Claims 3 and 4, directed to Species 2 no longer withdrawn from consideration because the claims require all the limitations of an allowable claim. However, claims 6-27, 29-32, 34, 35, 37 & 38, directed to other Species withdrawn from consideration because they do not require all the limitations of an allowable claim. Accordingly, **claims 6-27, 29-32, 34, 35, 37 and 38 are canceled.**

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present

application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

EXAMINER'S AMENDMENT

3. Please see previous notice of allowability mailed 2/20/2008 for the same Examiner's amendment for claims 1 and 40.

Allowable Subject Matter

4. **Claims 1-4, 28, 39 and 40** are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 1, the prior art of record fails to teach or fairly suggest the combination of all limitations of claim 1 that includes **"in each pair of the pixel units of the nth row and the n+1th row corresponding to each other, the gate electrode of the first transistor of the pixel unit of the nth row and the gate electrode of the fourth transistor of the pixel unit of the n+1th row being formed in one continuous pattern of a same conducting layer, wherein photoelectric converter and the first transistor being adjacent to each other in the row direction, the second transistor and the third transistor being adjacent to each other in the column direction, the gate electrode of the first transistor and the**

gate electrode of the fourth transistor being arranged so that a gate width direction thereof corresponds to the column direction."

Regarding independent claim 40, please see the office action mailed 10/5/2007 for the reason for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
